- Quick Setup Guide

Installing your microphone

- Plug the USB connector into an available external USB port on your computer or laptop. On most computers, drivers install automatically and your microphone will be ready to use.

Note: On Windows, if you are prompted with the *Add New Hardware Wizard*, follow the steps to download and install the driver. This microphone is also Mac™ compatible.

**Adjusting the volume**

You can adjust the volume by turning the volume knob on the microphone.

OR

Your computer may also have volume controls in the operating system or within software that uses the microphone.

Troubleshooting

If your computer or recipient is not picking up audio from the microphone, attempt the following fixes:

- Check the volume levels of your computer's speakers.
- Check if your computer's speakers are muted either in the operating system or on the speakers themselves.
- Check your operating system's audio input settings.
- Check the microphone's volume and on/off settings.
- Restart computer.

Note: If you cannot find your operating system's audio settings, refer to your computer's manual.
